Project Title: Social Media Platform

Course Name: Web Development (CMPS 350)

Group Members:

- Mohammed Alromaihi 202002029
- Abdulla Alhajri 201901728
- Saoud Almehsen 202001760
- Nasser Nasser 202205729

Project Overview

This project presents the development of a front-end social media platform like applications such as Twitter and Instagram. The system allows users to register, log in, create posts, interact with other users, and manage their profiles.

The platform was built using **HTML5, CSS3 (Flexbox and Grid), and Vanilla JavaScript**, without using any external libraries or frameworks, as required. All data, including users, posts, likes, and comments, is stored locally in the browser using **local Storage in JSON format**, ensuring persistence across sessions.

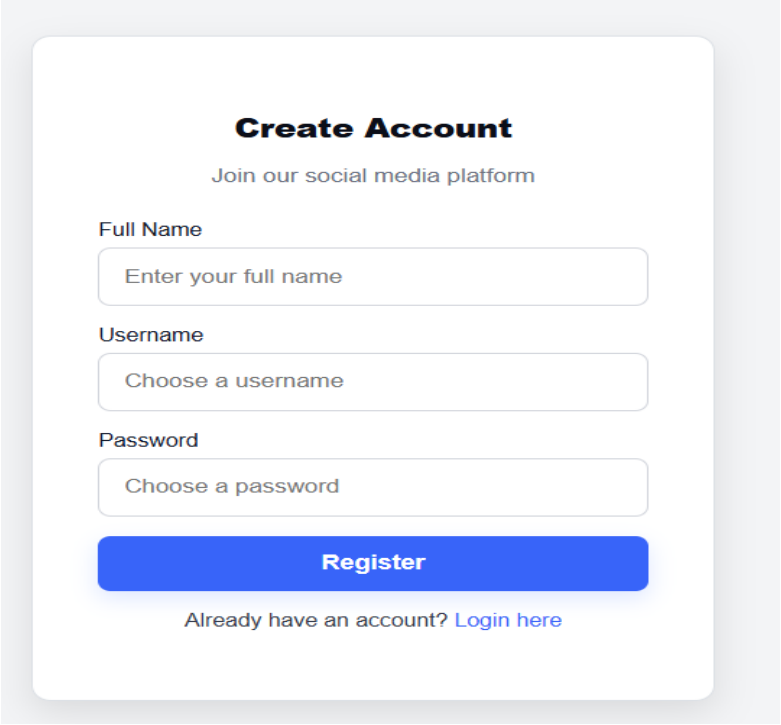
Features Checklist

Feature	Status	Notes
User Registration & Login	✅ Implemented	Users stored in localStorage
News Feed	✅ Implemented	Shows posts (recent & following tabs)
Create Post	✅ Implemented	Posts appear instantly without reload
Delete Post	✅ Implemented	Only users can delete own posts
Like System	✅ Implemented	Like/unlike with count update
Comment System	✅ Implemented	Comments saved per post
User Profile Page	✅ Implemented	Shows user info and posts
Edit Bio	✅ Implemented	Only profile owner can edit
Follow/Unfollow Users	✅ Implemented	Updates followers/following
Search User	✅ Implemented	Navigate to user profile
Data Persistence	✅ Implemented	Using local Storage

How to use the Application

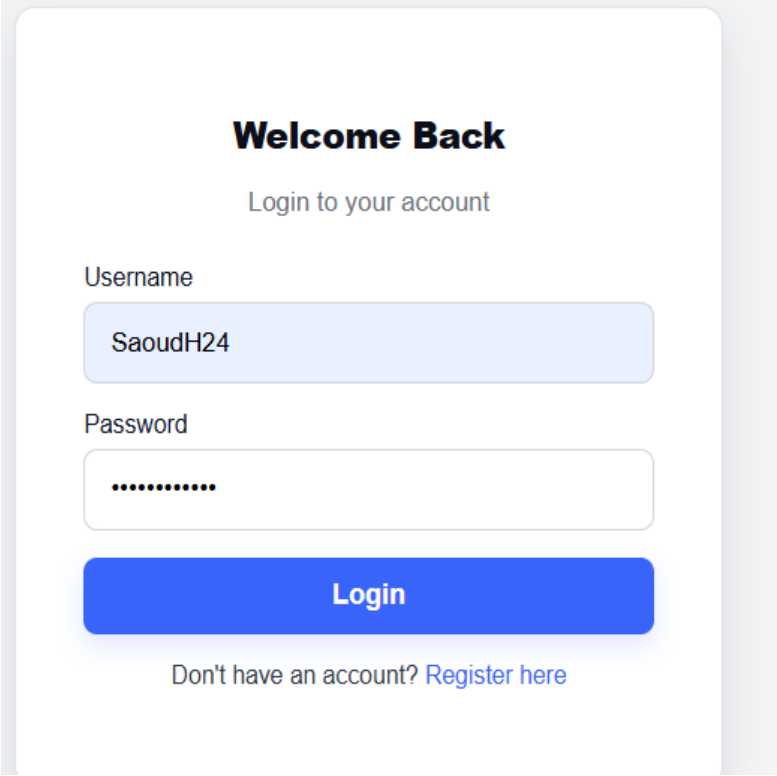
1. Register a New User

- Open register.html
- Enter full name, username, and password
- Click **Register**
- You will be redirected to the login page



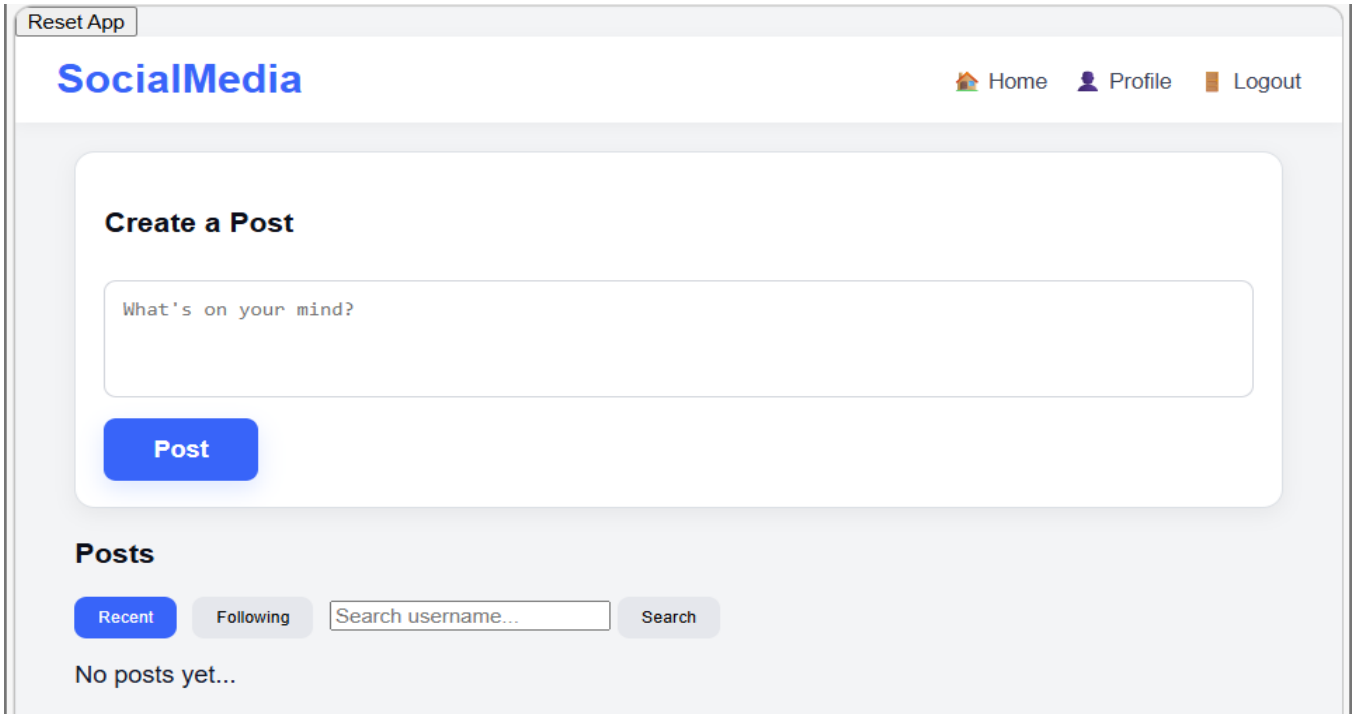
2. Log In

- Open login.html
- Enter your username and password
- Click **Login**
- You will be redirected to the home page (news feed)



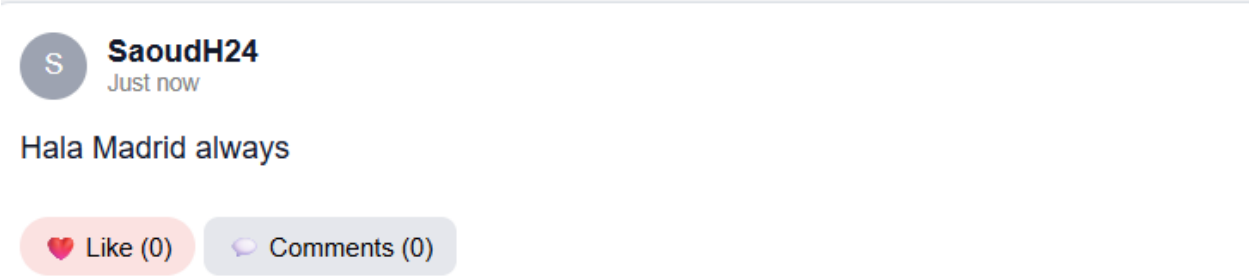
3. Create a Post

- In the home page (index.html)
- Write text inside "What's on your mind?"
- Click **Post**
- Your post will appear immediately at the top



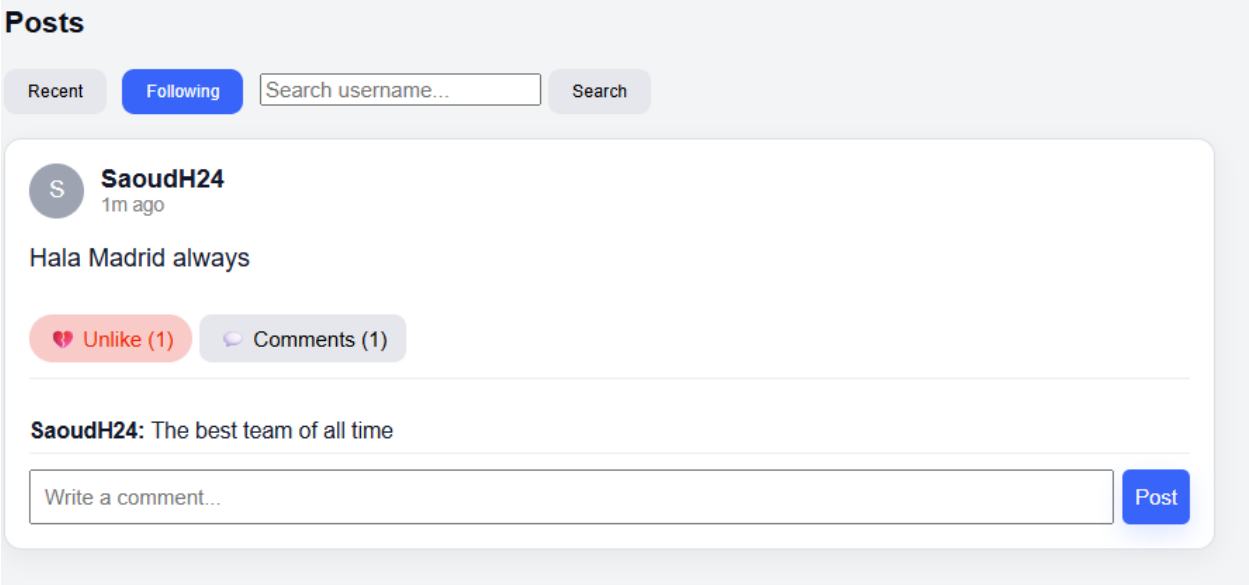
4. Like and Comment on Posts

- Click ❤️ **Like** to like/unlike a post
- Click 💬 **Comments** to open comments
- Write a comment and click **Post**



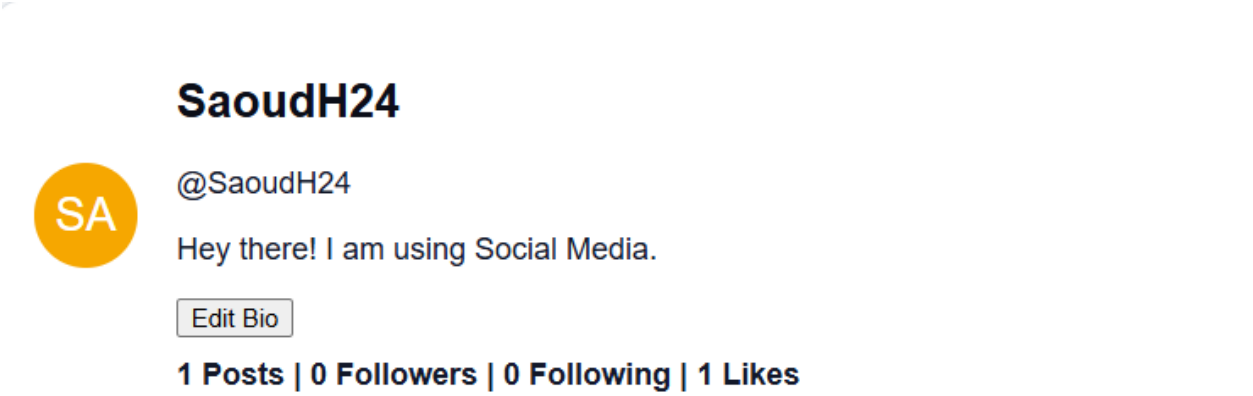
5. Switch Feed

- Click **Recent** → shows all posts
- Click **Following** → shows only followed users' posts



6. View Profile

- Click your username or go to **Profile page**
- You will see:
  - Username
  - Bio
  - Posts
  - Followers / Following count



7. Delete a Post

- Go to your profile
- Click **Delete** on your post
